

Special Lecture on Comparative Agricultural Studies 16 (1 credit)

# Multi-perspective Rural Planning Theory and Methodology

## Abstract

The current rural planning has been widely concerned by the academic circles all over the world. This course aims to : 1. Introduce the evolution characteristics of rural construction in China since the Reform and Opening-up from multiple perspectives. 2. Concepts and research methods of rural planning in China. 3. Analyze the rural development model. 4. Teach the methods of rural planning and design. The object of the study is the rural planning cases in the Yangtze River Delta region of China. The study includes multiple perspectives on ancient village preservation, rural landscape, rural aging space renewal, rural ecological landscape restoration and industrial revitalization.
